In Duckburg everybody is on social media. Huey, Dewey, and Louie just love Instagag, I share funny pics on my Snoutbook page, and even Grandma Duck quacks away on Quacker. It is often great fun but every now and then somebody goes ‘over-the-top’ and to be honest, that does happen to me on page 3 and onwards. It starts out as an innocent prank, but it gets terribly out of hand and that’s no fun for anyone! However, you may also goof enormously by accident, for instance by posting an awkward pic. How to avoid such Goofy moments is explained on page 9. This booklet contains more hints and tips on how to use social media safely. It also gives you a short overview of examples on how parties work together to make sure people are safer online.

All the best,

Uncle Donald

This DigiDuck Safer Online was made in the context of the Global Forum on Cyber Expertise as part of the Global Conference on Cyber Space (The Hague 16-17 April 2015). It is a translation of the Dutch DigiDuck ‘Veilig internetten’, supported by KPN, T-Mobile, UPC, SIDN, My Child Online, Veiliginternetten.nl and Sanoma.
Look on my phone then...

WAK!

I’ll hack his Snowbook account, and post something that’ll make him repent for ever!

Here’s his page. Dear me! Look at this profile pic!

Such a phiz is just perfect for advertising insecticide!

Srry! Jones has made a fool of me on his Snowbook page!

Bones! Where are you? I’ll teach you a lesson for mocking me!

I know his e-mail address, so if I just unravel his password! It can’t be that complicated, knowing that simpson...

...neighboursquare... GOTCHA!

...No capitals, punctuation marks or digits... He’ll pay dearly for his carelessness!

There he is, the bully! Look at him guffawing over his stupid phone!

Whahaha!

What he can do, I can do too! And better!

Shall I offend all his friends? No, that’s no good! He’s only got mates at the bowling club and a second cousin at Yokel Town...

That’s it! He needs FRIENDS! I’ll post an INVITATION on his Snowbook page!
"I'll invite the whole town to his garden... yes!"

Instead of grilled skewers he'll eat humble pie! ![Hahaha!]

Hello, guys! That smells delicious! But what's going on at Jones' place?

His garden's filling up with visitors!

They've been invited by Uncle Donald!

What're you up to, Uncle Donald?

I've hacked Neighbour Jones' Snowbook page! That's my revenge for his dirty trick!

Have you gone mad? Quarrels must NEVER be fought out on the internet!

That spells trouble!

Hahaha! At least he'll have a nice day for once!

That remains to be seen, Uncle Donald!

What exactly did you invite them to?

Hey, whose side are you on, traitors? So and lay the table and put up the barbecue!

Yes... Uncle...

Donald!

It's up to him then!

How dumb can Jones be, to use such a weak password?

Neither of them should be on the internet!

A barbecue? Why?

Never mind...

Apart from a stronger password, Jones should also have had a firewall!

Anyway, he's got a terrific smokescreen!

Cough! Cough!
Global Forum on Cyber Expertise

We truly have a global challenge, together: how do we make children, the general public as well as professionals aware of cyber security?

Within the Global Forum on Cyber Expertise, parties have taken the initiative to strengthen cooperation on raising cyber security awareness by creating more opportunities for governments, the private sector, civil society, citizens, and all other actors to engage and develop innovative solutions. This Digiduck - Cyber Security Awareness special is an example of a playful tool to raise awareness among the youngest in our societies.

Other inspiring examples, all based on multistakeholder partnerships to show the crucial role multiple actors have in working on a better and safer cyber space are:

- Organising a Cyber Security month or week: in Europe as well as the United States this is organised by government and industry together to make citizens aware of online security and empower them to stay safer and more secure online: www.staysafeonline.org/nsam, www.cybersecuritymonth.eu/whats-ecsm, www.alertonline.nl

- Celebrating the Safer Internet Day: landmark event, celebrated each year all over the world in February (see page 19 and www.saferinternetday.org)

- Organising expert sessions for government and industry together to exchange knowledge and experiences and to define the next important steps which are more powerful when made together

- Creating an online place for information and step by step instructions for safe use of internet and how to secure devices. And make this website easy to find. www.veiliginternetten.nl/about

- Looking after your youth: give them tools to solve problems online, such as cyberbullying, abuse of identity, grooming, loverboys and so on. www.meldknop.nl

Online Goofy-moments

Scrooge McDuck, Daisy and Master Muddle-head had better not posted these photos on the internet. Why not? Have a good look!

Daisy Duck

I bought these shoes for € 80 at The Hornets’ Nest, but they’re still unused in my cupboard! Interested? Bids starting from € 40!

Scrooge McDuck

Greetings from Ca$htown! Just bought three oil-wells, so will treat myself to half an ice-cream!

Master Muddle-head

I hope my pupils are ready for a #history test!

HueyDeweyandLouie

We are now! HEHEHE!

LizJlBabs

WOHOO! Thanks Master Muddle-head!

MasterMuddlehead

You will only understand this if you’re still in school.

The shoes are still unused in the cupboard.

Thanks for telling, Scroogy! I'm gonna fly straight to your money-warehouse to water the plants! HA! HA!
Are you a Cyber Whiz or a Surf Zombie?

TEST AND... TICK AWAY!

1. A pop-up appears on your screen: “Hooray, you’re the 6,369,548th visitor of this site! Click here to get a free tablet from Gyro Gearloose! No kidding!” Would you click on the link?
   - Yes  
   - No

2. To save time (and by doing so, being able to ZZZsleep longer), Gus Goose uses the same password for every website. Do you also do that?
   - Yes  
   - No

3. Are you as welcoming as Dora Duck - not protecting your profiles, so everybody can read your posts and see your pics?
   - Yes  
   - No

4. Uncle Scrooge posts a lot online: varying from adverts to quarrels with Flintheart Glomgold.... “If I do not put my name below, nobody will ever find out it is me! HA!” Is Uncle Scrooge right?
   - Yes  
   - No

5. Surfing on a public Wi-Fi network (= free internet) is totally safe. Crooks like The Beagle Boys can never have access to your device through this network.
   - Yes  
   - No

If you ticked ‘No’ everywhere, you are surfing well and, above all, safely!
Hi there! Chatting away on social media like Instagram and Twitter is great fun, but sometimes you may have a Goofy moment. To avoid online trouble, I thought about a few tips. And... feel free to SHARE this wise lesson!

1. **Think Before You Share Something**
   Internet has a memory like an elephant. So, think carefully before you say something or post pics. Once something is online, it will be there forever. Especially when it has been shared by others. Donald, for instance, confessed ten years ago that he still sleeps with a teddy bear. In fact, this picture is still retweeted.

2. **Do Not Post Things When You Are Angry**
   This tip relates to tip 1 in a way. When you are angry, you had better count to ten. (Or if you find that too difficult, to five). Anyway, when you are angry, it is wiser not to post anything. Because you are likely to get an even angrier response. Just think of that saying... eh... Sow the storm and reap head wind. Not funny. :-(

3. **Do Not Share Too Much**
   Never give out your home address, your account details or your phone number. Nasty types like The Beagle Boys might do bad things with this info. That's why I would like to ask you NEVER to tell ANYONE that my pin code is 1234. Thanks a million!

4. **Keep It Pleasant**
   There will always be discussions on social media, and differences of opinion are okay, but do try to respect someone else's ridiculously stupid... eh... different point of view. Anyway, do not offend anyone, for what you say is what you are. And... eh... in case somebody is indeed unkind or mean to you, just don't respond.

5. **Think Of The Other Person**
   Now you know that you should be careful with sharing things on social media. But remember also to be careful with your friends. Once Mickey had put up a Xmas dinner picture on Snotbook. I happened to have smudges all over me, 'cause I had made a mess. I asked Mickey to take it down, otherwise everybody would think I am clumsy!

6. **Never Eat Soup With A Fork**
   Actually, this has nothing to do with the subject... it seemed a good tip to me!
THE VOICE OF YOUTH

Decisions about the future of the Internet are usually made by a generation that can be defined as the 'Internet immigrants'. They came, after all, into contact with the medium when they had safely reached adulthood. But what does the generation that grows up with the Internet think of the digital developments and the various Internet issues?

Start a youth council or organize debates and meetings
To talk with them about privacy, security, freedom of speech, transparency, diversity, openness, entrepreneurship, social media and mobile Internet...

- To ask them what they think
- To know what is going on in their online lives
- To follow new trends among them at an early stage
- To really get to know what young people want and need at different ages
- To help and advise YOU on how to educate them
- To hear how they see the digital future

DIGITAL FUTURE
Case #471: the impossible break-in

The research centre has had a break-in. The head of the facility, Dr. Dice, is desperate and calls on Mickey for help.

Meet Dr. P.C. Data! His laptop is missing, along with all our research.

Our lab has a ceiling out of steel! And for safety, the inner and outer walls are also made of steel.

This floor is pressure sensitive. You must enter a CODE or it will trigger the alarm.

AH! So the burglar knew the code!

No, only I know! He must have gone through the window!

What? One had been left open?

This one here! It might seem crazy, but we always work with smelly stuff.

I can tell!

This lab is located on the top floor! Unless the thief had a way to fly...

No, that's not how it happened!

Do you know how?

Boy, I've made a decision! We're going to make a world tour! Pack your bags!

Yippee!

That'll be cool!

We're coming!

Later...

Nothing forgotten, boys? Then, here we go!

We won't get bored with our racks!

Just look at that, what a beautiful sunset!

Oh no! I've lost!

in France...

The Eiffel tower, guys! Built in 1889 on the occasion of the World Exhibition!

Don't run so fast!

Huh?

in Italy...

The leaning tower of Pisa! Smilie!

With the high-score I simply can't laugh!

Mickey
CELEBRATE SAFER INTERNET DAY!
HELP TO CREATE A BETTER INTERNET

- SID is celebrated each February in more than 100 countries across the world.
- Various activities and events by schools, industry, government and NGOs reach millions of children and young people across the globe.
- We all have a responsibility to make the internet a better place to play, learn and socialise - let's create a better internet together!

Find out what's happening near you and get inspired at www.saferinternetday.org

Safer Internet Day (SID) is organised by the joint Insafe/INHOPE network, with the support of the European Commission.

LEARN HOW TO CODE
A POWERFUL WAY TO EXPLORE IDEAS AND TO INNOVATE

- Apps, websites and lots of other things
- Helps logical and structured thinking
- Helps to understand how technology works
- Helps to keep up with innovations
- Useful in all (future) professions
- But the world is short on coding talent...

Join people who code during Code Week, learn how to code at www.code.org and get inspired at www.codeweek.eu

Code Week is part of the European Code Week – an initiative of EC, the “Young Advisors” and the European eSkills for Jobs campaign.
On the internet you will find lots of information for your book report or school project. However, misinformation, jokes and adverts are on the web as well. How will you be able to find out whether the info you have found is reliable?

**STEP 1 Who’s the maker?**

Get your info from a reliable website. Look closely who has made the website. Is it an expert, an advertiser, or someone who is writing just for fun?

Suppose you are trying to find tips on looking after the plants in class. You stumble upon these three sites:
- Scrooge’s big plants sale with tips on nursing plants;
- Clarabelle’s garden talks;
- The Woodsman’s Manual on plants.

Where would you find the most reliable info? Who will know the most about plants? Who is only after making money? Looking at a site this way before you start reading might save you a lot of time! In this example, the site of the Woodsman’s Manual is very reliable.

**STEP 2 Second source**

Suppose you have found what you are looking for: like “Do not water a plant too often!” Do not put away the watering can immediately, but look further and try to find a second source. Read a book or ask the florist if it’s good advice. Telling another website may also help. But beware: it may just have been copied from the first site. In that case, you will have to continue your search.

**STEP 3 Common sense**

When you read something bizarre, like “Plant eats man!”? Stop and think! Have you read about it in the papers? Was it on the news? No? Then it is probably a hoax: a story made up to goof other people.

Sniffing around efficiently

In order to find the right information you should first and foremost delimit your search as much as you can. So, first think carefully about what you want to know exactly and do not choose a general search term. For instance, if you just type in ‘plants’, you will get a tsunami of information. A better option is ‘gaggle lily’. Or use a complete sentence to make your search more specific, like ‘How much water does a Quackery Quacktus need?’ The more concrete you are, the better the results will be! Also, use more than one search engine. That way, you’ll be able to compare the results.
Gus Goose

I can’t, Gyro! I’ve got to feed the cows!

Superficial work!

Huh?

What do you mean?

The computer can do that work for you, Gus!

Look! If you connect this computer to a fodder-supplier each cow automatically gets exactly the right portion of food at the right time.

Fantastic! It’s a pity Dora still wants to do it all in the old-fashioned way!

Go talk to her! You could convince her, if you try!

And indeed...

Are you serious, Dora? Terrible!

Hmm, such a thing may be handy!

One week later...

Oh no! I don’t want such modern rubbish for my cows!

But, Dora! Didn’t you use the computer for feeding the cows?

Eww! I wish I’d never listened to Gyro!

Gyro’s World

In the Clouds

Cloud is another word for a network of computers and data shared through the internet. You can store your pictures on a web cloud. The good thing about it is that you cannot lose this cloud and you are always able to access it, with different devices. But only when you are online!

Code

A browser, the apps on your tablet and eyephone, Snoutbook: they have all been made with code. In fact, coding is quacking with your computer, writing programmes so you can game away or visit Donaldduck.nl. And the real cool thing about it is: although you may think that coding is merely the privilege of clever clogs like Gyro Gearloose, you can do it too!

What are Cookies?

These cookies are not edible. They are small files saved on a computer when you visit a website. When you go back there later on, a file like that keeps a kind of diary. It registers a lot how often you click on something, the time you spend on a page, which language you have chosen, etc. They’d better call cookies Nosey Parkers!
Donald Duck: Well, I've put my birthday wishes on Quacker! Whoopee for modern communication!

Hello Grandma! I've read Donald's birthday wishes on Quacker, so I thought, I'll just pass it on to you!

Thanks, Daisy! A PHONE is modern enough for me!

Something for his GARDEN, Donald quacked... I just won something in a lottery of the garden centre!

For his garden, isn't it? I'll get something cheap!

I've got it!

Me too!

And me!

That nasty Donald! Something for his garden!

I hope he likes this!

GARDEN CENTRE

Whoopie for modern communication!

Sigh!

End
